JBIS Journal of the British Interplanetary Society

VOLUME 58 2005

Issue No:	*Themes*
1/2	Space Launchers Space Monitoring Mars Exploration Interstellar Studies
3/4	Nuclear Pulse Propulsion Orbital Mechanics Advanced Launch Systems Human Spaceflight Astrobiology Human Future and Space
5/6	Interstellar Flight Solar Sailing Astrobiology Mars Exploration
7/8	Astrobiology Attitude Control Airbreathing Propulsion Space Tourism Electric Propulsion NEO Impact Prevention Interstellar Studies
9/10	Mars Exploration Tether Launch Systems Solar Power System NEO Impact Prevention Interstellar Studies
11/12	Crew Transportation Systems Search for Extra-Terrestrial Intelligence Exobiology Planetary Exploration Terraforming Artificial Planets Interstellar Studies Large Structures Advanced Propulsion

AUTHOR INDEX

Baxter S.	A Human Galaxy: A Prehistory of the Future	138
Baxter S.	Mars the Recording Angel: Traces of Extra-Martian Events in Polar Layered Terrain	206
Bonin G.R.	Initiating Piloted Mars Expeditions with Medium-Lift Launch Systems	302
Cirkovic M.M.	Permanence – An Adaptationist Solution to Fermi's Paradox?	62
Clark P.S.	The First Flights of China's Shen Zhou Spacecraft – Part 3	103
Cockell C.S.	The Unsupported Transpolar Assault on the Martian Geographic North Pole	28
Cockell C.S.	Duties to Extraterrestrial Microscopic Organisms	367
Deardorff J. *et al*	Inflation-Theory Implications for Extraterrestrial Visitation	43
DeBiase R.L.	Concept for Very Large Space Based Radio Telescope for SETI	357
Dickinson R.M.	A Concept GEO-SPS & Airship Multi-Megawatt Power Relay System	298
Fearn D.G.	The Application of Gridded Ion Thrusters to High Thrust, High Specific Impulse Nuclear-Electric Missions	257
Friedman G.	Comparing Mass Driver and Disperser Concepts for Non-Nuclear Mitigation of Asteroid Threats	310
Gros C.	Expanding Advanced Civilizations in the Universe	108
Hawkey A.	Physiological and Biomechanical Considerations for a Human Mars Mission	117
Hempsell M.	Multi-Role Capsules: Fulfilling Their Potential	347
Hempsell M.	Terraforming in Context of the Evolving Space Infrastructure	385
Hempsell M.	Some Speculations on the Construction of Artificial Planets	392
Jack C. *et al*	Spacefarer Solar Kites for Solar System Exploration	155
Johnson L. *et al*	A Strategic Roadmap to Centauri	316
Kammash T.	Nuclear Powered Laser Driven Plasma Propulsion System	407
Kangi A.	The Mechanism of Valles Marineris Formation	34
Knapman J.	Dynamically Supported Launcher	90
Landis G.A.	Analysis of a Lunar Sling Launcher	294
Lappas V. *et al*	A Solar Kite Mission to Study the Earth's Magneto-Tail	9
Lappas V. *et al*	NACON: A Nano-Satellite Constellation for Space Weather Monitoring	19
Long K.F.	Black Holes Wormholes & the Development of a Dynamic Warp Drive Metric	146
Matloff G.L. *et al*	Suggested Targets for an Infrared Search for Artificial Kuiper Belt Objects	51
Matloff G.L. *et al*	Applications of the Electrodynamic Tether to Interstellar Travel	398
Mautner M.N.	Life in the Cosmological Future: Resources, Biomass and Populations	167
Michaud M.A.G.	Broadening and Simplifying the First SETI Protocol	40
Moir R.W. et al	Analysis of Interstellar Spacecraft Cycling Between the Sun and the Near Stars	332
Morabito M.	W.W.W. Moon? The Why, What, and When of a Permanent Manned Lunar Colony	131
N. Kaya *et al*	Crawling Robots on Large Web in Rocket Experiment on Furoshiki Deployment	403
Olds J.R. *et al*	Space Tourism: Making it Work for Fun and Profit	241
Parkinson B.	The Carbon or Silicon Colonization of the Universe	111
Parkinson B.	Partial Beanstalks for Mars Exploration	197
Parkinson B.	Evolutionary Scenarios for the Human Exploration of Mars	201
Pathan A.	A Geometric Derivation and a Solution of Barker's Equation for the Time of Flight Along parabolic Trajectories	82
Phipps A. *et al*	Mission and System Design of a Venus Entry Probe and Aerobot	374
Sato T. *et al*	Development Study of Mach 6 Turbojet Engine with Air-Precooling	231
Shmatov M.L.	The Typical Number of Antiprotons Necessary to Heat Spot in the D-T Fuel Doped with U	73
Shmatov M.L.	Some Problems Related to Safety and Efficiency of the Use of Antihydrogen an Antiprotons	326
Tang B.L.	Many Possibilities for Life's Emergence	218
Willson D. *et al*	A Proposed Mars Base Design Adopting a Horizontally Landed Bent Biconic Vehicle	181
Walker R. *et al*	Concepts for Near-Earth Asteroid Deflection using Spacecraft with Advanced Nuclear and Solar Electric Propulsion Systems	268
Willson D. *et al*	MARS-OZ: A Design for a Simulated Mars Base in the Australian Outback	282
Xu Y.	Lyapunov Robust Control for the Coupled Large Angle Relative Trajectory Following Problem	223

SUBJECT INDEX

Airship relay 298
Antimatter 73,326
Artificial planets 51,392
Asteroids
  deflection propulsion 268,310
  dispersal 310
  Kuiper Belt 51
Astrobiology 62,108,167, 206,218,367
Attitude control 223
Barker's equation 82
Biomechanics 117
Black holes 146
Capsule - manned 347
China 103
Colonisation 131,138,316
Control systems 223
Correspondence (corrections) 211,279
Cyclic trajectories 332
Economics 241
Electrodynamic tethers 316,398
Europa 218
Fermi paradox 43,62,108
Gas gun 2
Geotail mission 9
Infrastructure
  cable launch 90
  manned mars exploration 28,201
  space elevator 197
  space habitats 385
  spaceplanes 231
Interstellar propulsion 73,146,316, 326,407
Interstellar travel 138,316,332,398
Ion thrusters 257
Kuiper Belt 51
Launch vehicles
  cable launch 90
  frozen propellants 2
  gas gun 2
  planetary ascent 302
  reusable 231
  sling 294
Life 62,138,167,218
Manned spaceflight
  capsule 347
  China 103
  Mars missions 28,111,181, 201,282,302
  Moon 131
  physiology 117
  Tourism 241
Mars
  archaeology 206
  glaciology 206
  life 218,367
  Manned missions 28,111,181, 201,282,302
  Phobos beanstalk 197
  Polar expeditions 28
  Valles Marineris 34
MARS-OZ programme 181,282
Microsatellites 9,19,155
Moon
  sling launcher 294
  manned missions 131
Orbital mechanics 19,82,223, 310,332
Parabolic trajectory 82
Physiology 117
Planets
